● Energy Logistics

**Scomi**

## Our Services

Scomi Marine offers two distinct and separate operations according to industry focus:

- Marine Logistics Services which provide transportation of bulk aggregates for the coal industry
- Offshore Support Services which provide various types of vessels to the offshore oil and gas industry

### ● Marine Logistics Services

Our Marine Logistics Services division has a track record of over 30 years in the provision of third party logistics services to the energy resources industry, while our core team for the coal transportation business has garnered approximately 20 years of experience. Our services include:

- Inbound and outbound logistics
- Coal transportation
- Port and terminal management services

Our marine logistics business focuses on coal transportation for major coal producers in the region. This starts from the barge loading point to trans-shipment locations or coal terminals using tugs and barges. Scomi Marine currently owns and operates 90 vessels comprising 52 tugs and 38 barges. To cater to your additional needs, we also manage third party vessels, as and when required.

With the rising coal output driving a strong global demand for coal transportation, Scomi Marine is perfectly placed to provide efficient logistics solutions for your imminent success.

### ● Offshore Support Services

With over 30 years of experience in nearly all aspects of offshore support services, Scomi Marine's highly skilled team of professionals has provided services to most major offshore oil and gas areas in the region such as Indonesia, Thailand, Vietnam and Malaysia.

Our Offshore Support Services division provides vessels to the oil and gas industry, to support operations such as:

- Seismic surveys
- Towing of rigs
- Anchor handlings, positioning and mooring of drilling rigs
- Fire fighting
- Transportation of fuel, drilling fluids, cement, drill pipes and others
- Offshore accommodation facilities
- Standby safety
- Offshore construction and maintenance support

“ Over the last 30 years, Scomi Marine's relentless commitment to reliability, responsiveness and safety standards has built excellent working relationships with our clients. ”

### ● Realising Potential in Marine Logistics and Offshore Support Services

As a key player in the region and one of the major offshore marine companies in fleet ownership, Scomi Marine believes in providing only the very best to our clients in the energy supply chain.

Our group of companies offers two vital services to the marine business worldwide: the provision of marine logistics to the coal industry as well as offshore support services to the oil and gas industry.

At present, Scomi Marine owns and operates one of the largest fleets of vessels in South East Asia. With 105 vessels, including new builds, comprising 10 utility vessels, 3 anchor handling tug and supply boats (AHTS), 38 barges, 52 tug boats and 2 accommodation barges, we are in a prime position to service the energy sector in Malaysia, Singapore and Indonesia.

Backed by three decades of experience, our sound financial strength and our commitment to 100% client-satisfaction, Scomi Marine is well-placed to fulfill our aspiration of becoming a major energy logistics provider for the region.

We are wholly dedicated to working closely with you to fully understand your operational requirements. Taking our mutual businesses to new levels of performance as we help you realise and maximise potential in your respective fields of business.
